Mod Information

Version: 1.4

Date added: 22-04-15

Scratchmade by Vertelvis

Features

- High detail exterior
- High detail interior
- High detail engine
- Medium detail underbody
- High detail chassis
- Designed to work with my Car Transporter script
- (A selection of) factory colors included
- New York and Liberty City liveries and license plates included
- Liveries included: 2
- Livery 1: Mercedes-Benz of Manhattan (Mercedes-Benz of Algonquin)
- Livery 2: Cooper Classic Cars

Changelog

v1.1:

- Car Transporter script is updated to v1.1:
 - Changed the default menu toggle key binding to F10 (to not conflict with my newly released Westdyke Safehouse mod)
 - Added the option to select a random configured car to transport
 - Added the car configuration data for my latest car mod; the Ford Country Squire

v1.2:

- Improved body mapping
- Updated liveries
- New indicators
- Added windscreen tinting

v1.3:

- Fixed livery bugs

v1.4:

- New handling line
- Reverted to original GTA IV tire textures

Disclaimer

This mod has been thoroughly tested on several systems and in both GTA IV and EFLC. I have run this mod for hours and hours without any crashes whatsoever. Any strange behaviour ingame is most probably caused by not following the installation instructions, not having the required mods installed or incompatibility with other installed mods. Be aware that you always install mods at your own risk, and I am not responsible for any problem caused by this mod.

Release Sites

This mod is released and is only allowed to be hosted on the following sites:

- www.vertelvis.com
- www.gta4-mods.com
- www.gtainside.com

I do not upload my mods on other sites because they don't allow me to update my mods, which I regularly do since I always want to supply the community with the latest versions of my mods. In other words, this is done with you in mind!

Release

A lot of time went into making this mod. It was first started in 2010 and after a long break I decided to finish this mod 3 months ago. Since then pretty much every bit of free time went into this mod. I hope you respect my work and respect the following:

- You can not upload this archive or parts of this archive on any sites. I have uploaded them on GTA4-mods, GTAINside and my own site and that are the only sites they are allowed to be hosted on.
- You can not claim any this or any part of this mod to be your work, or use this or any part of this mod in your own mods.

Thank you,

- Vertelvis
