

OFFICIAL MANUAL

This is the manual for **DYOM – Driver 2: The Wheelman is Back – Chapter 3: Las Vegas Mission pack!**

Needed to install:

- DYOM 8.1 from GTAGarage:
<https://www.gtagarage.com/mods/download.php?f=35188>
- CLEO 4:
<https://github.com/cleolibrary/CLEO4/releases/download/v4.4.0/CLEO4.zip>
- DYOM# addon: <https://gtaforums.com/topic/927357-dyom-addon-for-dyom-81/>
- Driver 2 Skins (in the archive)
- Storyline (DSL) (in the archive)
- Audio (SD) (in the archive)
- Modloader: <https://www.gtagarage.com/mods/show.php?id=25377>

How to install:

- Install CLEO 4, then DYOM 8.1 to GTA San Andreas / User Files. After that, install the mission folder (DSL) - put it in the same directory as DYOM 8.1 (or just replace DSL folder from DYOM 8.1), then Audio (SD) in the same folder as DYOM (GTA San Andreas User Files). Install skins to modloader folder in the main folder of the game. Install DYOM # addon to CLEO folder in the main game (after installing CLEO 4)

How to disable storyline autorun?

- It's simple, basically just delete autorun file from DSL folder of the mission. If you want to play missions in non-storyline mode, make sure you rename files from DSL to DYOM1 – DYOM8.dat. For example – intro file is the first mission – so rename it to DYOM1 (it is the dat file so you don't need to write .dat), and then rename “1” file to DYOM2.dat (you need to write .dat) and do that for other files aswell (in order) - and then you will be able to play the mission from the Mission Start menu (“Y” button, Load Mission)

Mission Troubleshooting:

- In the mission “Beat the train” make sure you don't go all the way through train tracks, because you'll fail the mission – the mission timer is tight there, so make sure you just drive through normal road (not train tracks) to the very end, then at the last bit jump on the train tracks to get to the car that you need to get into. The method is shown in the gameplay video:
