

Requirements:

OpenIV <https://openiv.com/>

Maps

Liberty City V Remix, Vice Cry, Cayo Perico, San Fierro & Las Venturas and GTAIII have the fix and new SHV.net built in, you can find all of the links, here

<https://www.gtainside.com/en/gta5/mods/143510-liberty-city-v-remix-v-20/>

San Andreas and GTA3 Liberty City from MrVicho13 also have the fix, you can contact MrVicho13#9999 on discord or fb for them

Transfagarasan <https://www.gta5-mods.com/maps/transfagarasan>

Dubai Islands <https://www.gta5-mods.com/maps/dubai-islands-addonmap>

Red Dead Desert <https://www.gta5-mods.com/maps/red-dead-desert-addon>

Simpsons Hit&Run <https://www.gta5-mods.com/maps/simpsons-hit-run-level-one>

Lake Louise <https://www.gta5-mods.com/maps/lake-louise-addon>

Driver's Paradise Remastered <https://www.gta5-mods.com/maps/driver-s-paradise>

Description:

If you are using addon maps or my minimaps, and you have the latest update from Dec. 15 (patch 1.58 - v1.0.2545), a big part of the maps don't have collision anymore and my minimaps are broken, so you should install these oiv packs to fix them. If you have other maps you want me to fix, please request it on my patreon page, I made a tier for this, or contact me on my social media.

!!!IMPORTANT NOTE: If you have a map which is still working, but stopped working after you install this, we have to make a small change for it to work again, so let me know.

To install this:

Go to OpenIV, click on tools, select package installer, browse for the oiv with the fix you need, and install it.

In case you have ScriptHookVDotNet, copy the updated files by elcreador from ScriptHookVDotNet folder, in your GTA V main directory.
